

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

1) Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product trade name : **Green clay Illite superfine**
Description : Green powder
Origin of the ingredient : France
Product code : ADS-033-01
Brand : Les Argiles du soleil

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use : Clay for cosmetics use only
This clay is not advise for an internal use

1.3 Details of the supplier of the safety data sheet

Supplier : Ekokoza s.r.o.
Fryčovice 297, 73945, Fryčovice
e-mail address of person responsible for this SDS : IČ: 07508247, eshop@ekokoza.cz

1.4 Emergency telephone number

Nouzové telefonní číslo: +420224919293 , +420224915402 (telefon 24hod/
denně) Toxikologické informační středisko, Na Bojišti 1, 128 08 Praha2)

2) Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]
None
Classification according to Directive 67/548/CEE [DSD]
None

2.2 Label elements

Signal word : None
Hazard statements : Any significant effects or critical hazards known.

2.3 Other hazards

The fine dust caused by prolonged and repeated handling of this substance can potentially generate mild irritation of eyes, skin, nose and throat.

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

3) Composition

Substance/mixture : Mono component substance
Product description: Green powder, product 100% mineral
INCI Name : Illite (green clay)

Product/ingredient name	N°CAS	Hazards/Classifications	%
Illite (green clay)	CAS # 1318-93-0	Do not contains any hazardous component	100

4) First aid measures

4.1 Description of first aid measures

-Inhalation : Remove to fresh air. If continued respiratory irritation occurs or if breathing becomes difficult, seek medical attention.

-Skin contact : Wash off with soap and water, then continue to flush with water for 1 minute.

-Eyes contact :Hold eyelids open, flush with water and flush with steady, gentle stream for at least 1-2 minutes. Seek medical attention if irritation persists.

-Ingestion :Over exposure may cause constipation. Drink copious amount of milk/water.

-Protection of first-aiders :
Not any special advise.

4.2 Most important symptoms and effects, both acute and delayed

Most important symptoms and effects, both acute and delayed

- Inhalation : The fine dust caused by prolonged and repeated handling of this substance can potentially generate mild irritation of eyes, skin, nose and throat.

- Skin contact : A prolonged and repeated contact of this substance can potentially generate mild irritation of skin.

-Eye contact: A prolonged and repeated contact of this substance can potentially generate mild irritation of eyes.

-Ingestion : Any significant effects or critical hazards known.

Over-exposure signs/symptoms

Inhalation :

Adverse symptoms may include the following pain or irritation :

- Respiratory tract irritation
- Cough

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

-Skin contact :

Adverse symptoms may include the following pain or irritation :

- Irritation
- Redness

-Eye contact :

Adverse symptoms may include the following pain or irritation :

- Irritation
- Redness

-Ingestion : No specific data

4.3 Indication of any immediate medical attention and special treatment needed

No specific treatment.

5) Firefighting measures

5.1 Extinguishing media :

Suitable extinguishing media:

Water sprayed

Unsuitable extinguishing media :

No specific data.

5.2 Special hazards arising from the substance or mixture:

No special hazards

5.3 Advice for firefighters:

No specific data.

6) Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures :

For non-emergency personnel : Don't breathe the dust

Pour les secouristes : Use a special protective mask

6.2 Environmental precautions :

Avoid dispersal of material and contact with soil, waterways, drains

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

6.3 Methods and materials for containment and cleaning up

Collect the product manually or by aspiration, pour into a clean container and place in a garbage according to regulations.

7) Handling and storage

7.1 Precautions for safe handling:

Protective measures :

Avoid formation of dust

Advice on general occupational hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Material storage :

Keep container tightly closed and sealed until ready for use. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area

Contraindicated packaging:

Aluminium containers

8) Exposure controls/personal protection

8.1 Occupational exposure limits

No exposure limit value known.

8.2 Exposure controls :

Appropriate engineering controls :

Good general ventilation should be sufficient to control worker exposure

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Individual protection measures :

Eye/face protection :

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Hand protection :

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection :

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection :

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection :

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator

Environmental exposure controls :

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

9) Physical and chemical properties

Appearance

Physical state : Solid (powder)

Colour : green

Other information

freezing point : Not applicable

Boiling Point : Not applicable

Flash point : Not applicable

Explosive : Not applicable

volumetric mass : 0,95g/cm³

Solubility: Insoluble in water and other organic component

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

10) Stability and reactivity

Stability : No specific test data related to reactivity available for this product or its ingredients

Possibility of hazardous reactions :

Under normal conditions of storage and use, hazardous reactions will not occur.

11) Toxicological information

Acute toxicity : DL 50 oral > 5000 mg/kg

Eyes irritation : No known significant effects or critical hazards

Primary irritation: Dermatological tests

Bacteriologic control : Norm NF ISO 16212

12) Ecological information

Biodegradability : Product 100% naturel

No known significant effects or critical hazards for the environment

13) Disposal considerations

Waste treatment methods :

the generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste :

Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

Packaging Methods of disposal :

The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Special precautions

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

14) Transport information

Not regulated.

SAFETY DATA SHEET

Green clay Illite Bonneval superfine

International transport informations : Not regulated.

15) Regulatory information

Not applicable

16) Other information:

The green clay powder illite superfine is obtained by a mechanical grinding of the natural clay. The particle size is approximately 75 microns

Non ionized clay

Storage, Packaging, Gripping, Transport:

This product is sold in bags, in boxes.

Conservation period :3 years after opening.

Storing it in a dry, well-ventilated and free from microbiological contamination place

The data provided in this material safety data sheet is meant to represent typical data/analysis for this product and is correct to the best of our knowledge. The data was obtained from current and reliable sources, but is supplied without warranty, expressed or implied, regarding its'correctness or accuracy. It is the user's responsibility to determine safe conditions for the use of this product, and to assume liability for loss, injury, damage or expense arising from improper use of this product. The information provided does not constitute a contract to supply to any specification, or for any given application, and buyers should seek to verify their requirements and product use.
